D-1: Finally, let's release the pricing for the RespectUs export control platform

Dear Readers,

The 7 modules of our export control compliance digital platform will be ready for subscription tomorrow 15 March 2023.

Pricing is always an issue, but should not be the unique relevant criteria for subscribing or not. Did you get a feeling how much added value our platform can provide you in your daily compliance work? If not, have a look on our blog series to read what we have developed for you. And you can always ask for a demo and/or a chat with myself and my team for general or specific questions.

We wanted to have the pricing structure clean and simple.

First, our Knowledge Base module will stay entirely free throughout 2023.

Second, we did not want, at least in a first step, to relate the pricing for a module to the number of checks or processes you will perform in the module. So no counting of name checks, or product classifications, or license determinations.

A third point: Our monthly prices are flat rates, each of them valid for up to 3 users within a company. Additional fees will occur once you will add your 4th user, and so on.

A last point: We offer 20% discount if you subscribe to all 7 modules of the platform. An additional 15% discount applies if you commit to 3 year contract for your package.

And, just to remind you, that our modules and packages may be cancelled at any time, effective for the next billing day.

RespectUs Subscription Plans			
1	Knowledge Base	free
2	Product Classification	750 €
3	Sanctions & Embargoes	450 €
4	Customer Screening	380 €
5	End-Use Checks	320 €
6	Risk Assessment	180 €
7	License Determination	620 €
-20%	Package 7 modules	2.160 €
-15%	Package 3 year contract	1.836 €

All indicated prices are billed monthly, and are flat rates for 3 users per company. Additional user: 12 € / month.
Subject to VAT depending on the country.

But we do not want to loose you as a customer. We want to convince you of the added value and expertise we are providing. And go with you the long way of everyday compliance with export control regulations.

See you,

Cheers,

For the RespectUs team,

Patrick Goergen, CEO
