Glossary – Word of the Day: "Wassenaar"

A 26.000 people town in the province of South Holland, 10 km near The Hague (Netherlands); This is where in 1995, the Wassenaar Arrangement was signed to start a new type of multilateral cooperation in the domain of export control. In the framework, 42 countries are taking decision (only by consensus) on the scope of export controls, while practical implementation varies from country to country. The Munitions List and the List of Dual-Use Goods and Technologies find their origin here, and are then adopted, for EU countries, on the level of the EU Council and implemented in EU Member States.
